*i dreamt of liberty,
a small donkey gave it to*

Explanatory drawing
of the stretcher
(seen from above)

There are 4 models of tuning fork: XS, S, M and L

To determine which one is right for your animal, we need to know the width of the donkey's belly at the widest point.

To determine this width, you can use a large piece of cardboard and cut it with scissors until it fits.

Dimensions of stretchers :

Stretcher XS : inside width 47.5 cm, length 79 cm

Stretcher S : inside width 53.5 cm, length 90 cm

Stretcher M : inside width 59,5 cm, length 100 cm

Stretcher L : inside width 65 cm, length 110 cm
